This is the corner from Richard D. Talarczyk's tie sheet, dated 12/27/93. I have shown the corner's calculated position on this survey as located by us while surveying C.S.M. 2023 in 1996. We now have reason to believe the monument, its ties and all carsonite guard posts were intentionally destroyed. While performing this survey, we were unable to visit this corner due to an extremely hostile landowner. If the monument is gone, there is no way to replace it without a sheriff's escort, and if it were replaced under escort, I am certain that whatever was set would be again destroyed. I have supplied a W.C.C.S. coordinate for surveyors to use until the current landowner is no longer a factor. This corner location falls approximately 9.1' South and 27.3' West of a #8 rebar set by Aaron Austin by proportionate measurement.
